

# International Conference on Envisaging Vision Zero: Integrating Digitalisation and Sustainability

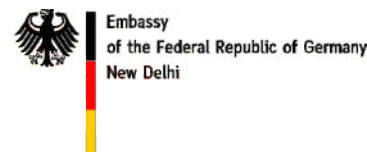

8<sup>th</sup> October, 2025, Silver Oak, India Habitat Centre (IHC), New Delhi

## Organised by

**VISION ZERO**  
Safety. Health. Wellbeing.

## Supported by

## Introduction:

In an increasingly complex world shaped by rapid industrialisation, urbanisation and growing environmental challenges, the demand for a paradigm shift in how we approach safety, health, well-being and sustainability has become critically essential.

The concept of Vision Zero, which advocates for the elimination of fatalities and harm in all spheres of life, has evolved beyond safety, health and well-being to encompass environmental and social responsibility.

To translate this vision into reality, two key drivers must converge: digitalisation and sustainability. These forces, when strategically integrated, hold the potential to create intelligent, adaptive systems that are both resilient and future-ready. Therefore, the digital transformation and sustainability together can lay the foundation for achieving Vision Zero.

In India, the Vision Zero framework is extremely appropriate. With a growing population, diverse industrial sectors, and significant environmental vulnerabilities, India must innovate to ensure that growth does not come at the cost of human life or ecological balance.

Achieving Vision Zero is no longer a sector-specific goal—it is a national and global imperative. By strategically integrating digitalisation with sustainability, countries like India can lead the way toward a future where safety, health, well-being, inclusivity and environmental integrity are non-negotiable.

## India at the Crossroads: A Unique Opportunity:

The journey to Vision Zero requires not just ambition, but alignment—of technologies with ethics, of development with environmental care, and of innovation with human values. The time to act is now.

India is uniquely positioned to lead the Vision Zero transformation. It has the technological capacity, a thriving startup ecosystem, and a growing commitment to sustainability as reflected in national missions like Digital India, Smart Cities Mission, National Action Plan on Climate Change (NAPCC), and Net Zero Target by 2070.

However, to unlock the full potential of digital and sustainable synergies, India must address challenges like digital access, regulatory readiness, infrastructure gaps, and skills development. This moment presents an opportunity for policy innovation, public-private collaboration, and global knowledge exchange - all of which are vital to make Vision Zero not just an ideal but an actionable reality.

## Conference Objectives:

- Foster collaboration between government, industry, academia, and civil society to promote Vision Zero.
- Demonstrate how digitalisation can be a powerful enabler of sustainability, safety, health, and well-being.
- Share global best practices and case studies relevant to the Indian context.
- Develop policy frameworks and actionable roadmaps that align with India's national priorities and global commitments.
- Empower professionals and communities with the tools and knowledge to implement safe, sustainable solutions.

## Bridging the Gap: Multi-Stakeholder Engagement:

The International Conference on "**Envisaging Vision Zero: Integrating Digitalisation and Sustainability**" serves as a dynamic platform for dialogue, knowledge exchange, and partnership development. It aims to bring together a global consortium of thought leaders, experts, innovators, and change-makers to forge a roadmap for a safer, smarter, and more sustainable future.

The conference will feature keynote addresses, technical sessions, policy roundtables, and interactive workshops that aim to:

- Identify synergies between digitalisation and sustainability goals;
- Showcase case studies and best practices from India and abroad;
- Facilitate capacity building and skill development initiatives;
- Address regulatory and ethical challenges in tech adoption; and,
- Develop actionable roadmaps for achieving Vision Zero in specific sectors.

## Eminent Speakers:

**Prof. Karl-Heinz Noetel**, President ISSA Construction, International Advisor VZ-RSI, Germany; **Ms. Meike Jäger**, Counsellor, Social and Labour Affairs /Business and Human Rights, German Embassy, New Delhi; **Dr. Sven Timm**, Dep. Director Main Prevention Department, DGUV, Board Member, DVR, Germany; **Prof. Partha Mitra**, IES (Retd.), Former Principal Advisor, Ministry of Labour & Empl., Govt. of India; **Dr. Mark Füllemann**, Founder and Director, Practice & Experience GmbH, Switzerland; **Dr. Jens Jühling**, President ISSA Electricity, Germany; **Mr. Pankaj Singh**, Group Safety Head, Adani Cement Group of Industries, Ahmedabad; **Ms. Pernille Tau**, Vice President, Global Services & International Vision Zero Consultancy, Human House, Denmark; **Dr. Lalit Gabane**, Director General, National Safety Council (NSC), India; **Mr. Sanjeev Raina**, Head- Corporate HSSE and Sustainability, BPCL, Mumbai; **Mr. Bernd Merz**, Senior Advisor, Prevention Department, BGBAU, Germany; **Mr. Anil Jauhri**, Former CEO, National Accreditation Board for Certification Bodies (NABCB), Quality Council of India, New Delhi; **Mr. Sigrid Roth**, Secretary General, ISSA Trade, Senior Consultant on Prevention and International Cooperation, BGHW, Germany; **Mr. Martin Rolf**, Inspector, Prevention Department, BG BAU, Germany; **Dr. Ursula Schies**, Co-Head PF+, BG BAU, Germany; **Mr. Sahil Goyal**, Dy. Chief Inspector of Factories, Min. of Labour, Govt. of Punjab, India; **Dr. Brij Mohan**, National Coordinator, VZ-RSI and Former Director, DGFASLI, Ministry of Labour & Empl., Govt. of India; **Ms. Kristina Eger**, Advisor for International Relations, BG BAU, Germany; **Dr. Avneesh Singh**, Principal Advisor, Indo-German Cooperation for Safety, Health and Wellbeing, and Former Director General, DGFASLI, Ministry of Labour & Empl., Govt. of India.
